Terminal Disclaimer

1. The terminal disclaimer filed on 7-5-05 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of 6,608,712 B2, had been previously reviewed and was accepted, and remains in effect. The terminal disclaimer has been and remains recorded.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of a structure having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, including the limitations added to claims 1, 31 and 40 by recent amendment, and in light of the Terminal Disclaimer. The prior art fails to read on the combination of claimed elements and claimed limitations, wherein the structure has a specific flexure configuration and a portion of underlying edges of the flexure assembly are adapted to contact the base upon rotation of the beam layer. Therefore, in light of the Applicants' arguments and/or amendments, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
